CHILDREN'S WORKSHOP

The children's workshops are part of the **paradise is *here* educational program** and aim at introducing young children to the world of performing arts.

The artist educators we work with are specialised in a wide range creative practices (physical theatre, mime, pantomime, clownerie), supported by a wealth of experience and qualifications.

The children's workshops are divided into **two sections**:

- the first part of each workshop is dedicated to improvisation, stage movement, work on rhythm, juggling and dancing
- the second sees the creation of a final performance, which will be presented in front of a public.

We will also work on the props, which will be made out of carton or paper.
